

Vitamin and Mineral Supplement with *Chlorella*

Product Description

Vitamin and Mineral Supplement with Chlorella is a balanced high-potency, multi-nutrient formula in a base of one of nature's superfoods. This product contains highly absorbable mineral chelates including trace elements, a balanced B-complex, and supportive nutrients to maintain daily health and vitality.

Immunotec has made its Vitamin and Mineral Supplement with Chlorella the cornerstone of the Daily Essentials Pack because this is a product that everyone can benefit from everyday. Even if you try to eat well, getting the optimal amount of nutrition in your diet is very hard to do. Health experts have begun to realize that most people simply cannot eat well enough to meet their nutritional needs.

Each and every component in our formula has been highly scrutinized and adapted to the needs of our population. For example, the vitamin D content is significantly higher than the majority of standard multivitamins you may find at the pharmacy or at the health-food store. This decision was based on recent clinical evidence that higher doses of vitamin D seemed protective against certain cancers and that those in the know have been advocating that we all need to increase our intake.

CHLORELLA – THE “SUPERFOOD”

Chlorella is a very small member of the family of blue-green algae. According to plant science, it was one of the first organisms to be able to convert sunlight

into biological energy! It provides a natural source of an incredible array of nutrients: proteins, essential amino acids, carbohydrates, vitamins, macrominerals, trace elements, and phytochemicals. Chlorella advocates have called it “The Perfect Food”.

Highlight Ingredients

Vitamins A, C, D, and E. Vitamin and Mineral Supplement with Chlorella supplies you with healthy levels of these important vitamins. Especially important is that this formula provides 2500 IU of vitamin A (as beta-carotene). This level is supportive of good health without being a risk for bone loss. You also get a full 800 IU of vitamin D. While the adult DV is only half this level, most health experts agree that daily requirements are too low for optimal health.

Balanced B-Complex. B vitamins like folic acid, B6, B12 and thiamine, are the nutrients that drive energy production in the body. Vitamin and Mineral Supplement with Chlorella provides a substantial dose of B vitamins to help you manage the energy demands of your day. This product also includes choline and inositol which are considered by many nutrition experts to be part of the B-Complex vitamins.

Mineral Chelates. This product provides zinc, selenium, copper, manganese, and chromium as highly-bioavailable chelates. Some of these minerals like zinc and selenium, are important antioxidants, and all of them help to control hundreds of chemical reactions in the body. These minerals are a perfect complement to those found in Pure Milk Calcium.

Chlorella. Chlorella is a type of blue-green algae that is incredibly nutrient rich. This superfood is a more than 50-percent complete protein and also contains the nutrients A, E, B12, niacin, choline, folic acid, thiamine, copper, magnesium, zinc, potassium, and chlorophyll. Chlorella also supplies glyconutrients like rhamnose, ribose, mannose, and fructose.

Complementary Products

Vitamin and Mineral Supplement with Chlorella is part of your **Daily Essentials Pack**, so you can take this product with all of your Immunotec products for the support of good health and wellbeing.

F.I.T.T Meal Replacement. Whenever you are dieting, it is very important to take a multivitamin.

Pure Milk Calcium is a perfect complement to the mineral chelates in the Vitamin and Mineral Supplement.

Features

- A balanced formula to support your healthy diet!
- Supplies a healthful dose of vitamins A, C, and E
- Provides a high dose of vitamin D for optimal nutrition
